Stephane KPOVIESSI

Data Engineer

Available for a permanent position

Python • PySpark • Azure Databricks

Data pipelines, migration, quality and industrialization.

Skills

Pipelines & processing
Python, PySpark, Pandas, ETL/ELT, ingestion, transformations.

Cloud & orchestration
Azure Databricks, Azure Data Lake, Airflow, AWS, Docker.

Storage & quality
SQL, PostgreSQL, pgvector, Medallion architecture, Data Quality, tests.

Delivery & tools
Power BI, Streamlit, FastAPI, Git, CI/CD.

Education

JUNIA ISEN Lille
Engineering degree - Big Data & Data Science, 2026.

JUNIA ISEN Rabat
Bachelor's degree - Electronics & Digital Systems, 2023.

Certifications

Data Analyst Career Preparation
Microsoft / LinkedIn Learning • 2024

Data Analysis with Python
freeCodeCamp • 2023

Create ML Models in Microsoft Azure
Microsoft / Coursera • 2023

Supervised ML: Regression & Classification
DeepLearning.AI / Stanford Online 2023

Languages

French - native
English - B2, Linguaskill Business

Leadership & associations

JUNIA ALUMNI
Network Committee

Vice President
Sept. 2024 - Aug. 2025
Coordinated and led alumni network activities and professional events.

Communications Lead
Sept. 2023 - Aug. 2024
Managed announcements and promoted network initiatives.

Profile

Engineering graduate in Big Data & Data Science, focused on Data Engineering. At Allianz France, I contributed to the migration of a SAS datamart to Python/PySpark and to a Medallion architecture on Azure Databricks. I design reliable data pipelines from ingestion to quality controls, with strong attention to functional validation and business use cases.

Experience

Allianz France - Data Engineer / Data Scientist Nov. 2025 - Apr. 2026
P4D, Advanced Data & Climate - Paris

- Migrated an Insurance datamart from SAS to Python/PySpark, validating functional parity across 15,000+ lines of code.
- Built a Medallion architecture on Azure Databricks integrating 150+ business rules.
- Developed a geospatial Data Quality pipeline to detect anomalies and improve downstream data reliability.
- Implemented SAS/Python automated tests to compare KPIs and secure regression control before production.

LYNE ET FRERES SARL - Data Analyst 2023 - 2025
Strategic support assignments - Benin / Remote

- Structured and analyzed commercial, operational and agricultural data with Python/Pandas to monitor KPIs.
- Automated recurring processing and delivered analyses through reports and Streamlit/web interfaces.
- Deployed internal open-source AI tools and automations (OpenWebUI, open models), with employee support and onboarding.

Groupe Sylvagreg - Machine Learning Engineer May 2024 - Aug. 2024
Lille, France

- R&D for a 3D reconstruction solution from 2D images, combining computer vision, photogrammetry and generative models in PyTorch.
- Preprocessing, data augmentation and inference pipelines; Docker containerization, AWS deployment and visualization interface.

Data Engineering Projects

BI RETAIL SOLUTION - PySpark, Airflow, PostgreSQL, Power BI, Docker
Sales/supply-chain data pipeline: ingestion, PySpark transformations, loading into a PostgreSQL warehouse and Airflow orchestration. Power BI dashboards for business monitoring.
github.com/EngineerProjects/BI_Retail

TECH WATCH AGENT - FastAPI, PostgreSQL/pgvector, Docker
Multi-source collection, PostgreSQL persistence, pgvector indexing and tracking API for an automated monitoring platform.
github.com/EngineerProjects/tech-watch-agent

Seshat - Python/Go, PostgreSQL/pgvector, RAG
Open-source platform: document ingestion, embeddings, hybrid search, local/cloud backend services and access controls. seshat-ai.com • github.com/KPO-Tech/seshat
