Profile

I help companies identify automation, internal tooling and AI integration opportunities, then turn them into practical solutions. From need analysis to delivery, I design and deploy workflows, open-source tools, internal assistants, RAG systems and AI agents adapted to business environments.

Business process -> Internal need -> Solution -> Integration

Services

AI audit	Processes, repetitive tasks, AI opportunities, prioritization and pilot scoping.
AI agents	Orchestration, multi-agent systems, tool calling, MCP, human-in-the-loop and agentic workflows.
RAG & Knowledge	Document ingestion, embeddings, vector databases, hybrid search and internal assistants.
Automation	APIs, internal tools, scheduled tasks, business services and back-office workflows.
POC -> integration	Prototyping, validation, testing, Docker, backend architecture and access security.

Seshat

Founder & AI Engineer — Sept. 2026 - Present
seshat-ai.com

Open-source agentic AI and automation platform

- Agentic AI and automation platform for building AI agents and workflows that integrate into enterprise environments.
- Python/Go architecture with backend services, local/cloud backend and an Electron/React desktop application.
- Agent orchestration, tool calling, MCP, human-in-the-loop, scheduled tasks and internal workflows.
- Hybrid RAG: document ingestion, chunking, embeddings, PostgreSQL/pgvector, Chroma, vector search and sourced answers.
- Multi-LLM integration with OpenAI, Mistral, Gemini and Ollama, with permissions, auditability and secure access control.

Use cases: internal assistants • Knowledge/RAG • back-office automation • agentic workflows • document processing

Experience

Allianz France - Data Engineer / Data Scientist — Nov. 2025 - Apr. 2026
Paris, France

P4D, Advanced Data & Climate

- Migrated an Insurance datamart from SAS to Python/PySpark, validating functional parity across 15,000+ lines of code.
- Built a Medallion architecture on Azure Databricks integrating 150+ business rules.
- Developed a geospatial Data Quality pipeline and SAS/Python automated tests for KPI validation and regression control.

LYNE ET FRERES SARL - Data Analyst — 2023 - 2025
Benin / Remote

Strategic support assignments - Recurring data analysis

- Analyzed commercial, operational and agricultural data with Python/Pandas to monitor KPIs and support decisions.
- Built reports, dashboards and Streamlit/web interfaces to deliver insights to business users.

Groupe Sylvagreg - Machine Learning Engineer — May 2024 - Aug. 2024
Lille, France

Computer Vision, 3D reconstruction, PyTorch, AWS, Docker

Contributed to computer vision and 3D reconstruction pipelines from 2D images, using PyTorch models, image processing and Docker/AWS environments.

Technical Projects

Tech Watch Agent - Python, FastAPI, LangGraph, PostgreSQL, pgvector, React, Docker

Multi-agent monitoring platform: scheduling, multi-source collection, synthesis, targeted reports, LangGraph orchestration and PostgreSQL/pgvector memory.

BI Retail Solution - Python, PySpark, Airflow, PostgreSQL, Power BI, Docker

Sales/supply-chain data pipeline: ingestion, PySpark transformations, PostgreSQL loading, Airflow orchestration and Power BI dashboards.

Stack

AI & Agents	LLMs, RAG, LangGraph, LangChain, MCP, Tool Calling, Human-in-the-loop, Embeddings, Agentic AI
Backend & Data	Python, FastAPI, Go, SQL, PostgreSQL, pgvector, PySpark, Pandas, REST APIs
Data / Cloud	Azure, ADLS, ADF, Databricks, Airflow, Delta Lake, Data Quality
Engineering	Docker, Git, CI/CD, automated tests, React, Electron

Education & Languages

JUNIA ISEN Lille - Engineering degree, Big Data & Data Science — 2026
JUNIA ISEN Rabat - Bachelor's degree, Electronics & Digital Systems — 2023
Languages - French native • English B2, Linguaskill Business English
