Stephane KPOVIESSI

AI / GenAI Engineer

Available for a permanent position

AI Agents • RAG • LLM Systems

Integrated, secure AI applications that are useful to business teams.

Skills

Agents & workflows
LangGraph, MCP, tool calling, human-in-the-loop.

RAG & LLM
Hybrid RAG, embeddings, pgvector, multi-LLM.

Backend & integration
Python, Go, FastAPI, PostgreSQL, Electron/React.

Production & cloud
Docker, Azure Databricks, AWS, Git/CI-CD.

Education

JUNIA ISEN Lille
Engineering degree - Big Data & Data Science, 2026.

JUNIA ISEN Rabat
Bachelor's degree - Electronics & Digital Systems, 2023.

Certifications

Microsoft AI Engineer Career Path
Microsoft Learn • **In progress**

Create ML Models in Microsoft Azure
Microsoft / Coursera • 2023

Supervised ML: Regression & Classification
DeepLearning.AI / Stanford Online 2023

Languages

French - native
English - B2, Linguaskill Business

Leadership & associations

JUNIA ALUMNI
Network Committee

Vice President
Sept. 2024 - Aug. 2025
Led alumni network activities and professional events.

Communications Lead
Sept. 2023 - Aug. 2024
Managed announcements and promoted initiatives.

Profile

Engineering graduate in Big Data & Data Science, designing GenAI systems that integrate into business applications: document ingestion, hybrid RAG, agent orchestration and backend services. With Seshat, I develop an enterprise-oriented AI platform; my Allianz experience adds practical grounding in data quality, testing and industrialization.

Experience

Seshat - Founder & AI Engineer Sept. 2026 - Present
Open-source agentic AI and automation platform

- Python/Go architecture with local/cloud backend and Electron/React application to deploy agents and workflows in business environments.
- Hybrid RAG: document ingestion, chunking, embeddings, PostgreSQL/pgvector and Chroma search, sourced answers.
- Agent orchestration: tool calling, MCP, human-in-the-loop and scheduled tasks to automate internal processes.
- Multi-LLM integration (OpenAI, Mistral, Gemini, Ollama), permissions, auditability and secure access control.

seshat-ai.com • github.com/KPO-Tech/seshat

Allianz France - Data Engineer / Data Scientist Nov. 2025 - Apr. 2026
P4D, Advanced Data & Climate - Paris

- Migrated an Insurance datamart from SAS to Python/PySpark, with validation across 15,000+ lines of code; Medallion architecture on Azure Databricks integrating 150+ business rules.
- Built a geospatial Data Quality pipeline and SAS/Python automated tests to validate KPIs and secure regression control.

GenAI Project

TECH WATCH AGENT - LangGraph, FastAPI, PostgreSQL/pgvector, React, Docker
Multi-agent technology monitoring platform: topic scheduling, multi-source collection, key insight extraction, sourced synthesis and targeted reports. LangGraph workflows with FastAPI backend, PostgreSQL/pgvector semantic memory, LLM/embedding configuration, execution tracking API and Docker/React stack to manage monitoring runs.

github.com/EngineerProjects/tech-watch-agent

Additional Experience

LYNE ET FRERES SARL - Data Analyst 2023 - 2025
Strategic support assignments - Benin / Remote

- Deployed internal open-source AI tools and automations (OpenWebUI, open models), with employee support and onboarding.
- Analyzed business data with Python/Pandas and delivered insights through reports and Streamlit/web interfaces.

Groupe Sylvagreg - Machine Learning Engineer May 2024 - Aug. 2024
Lille, France

R&D for a 3D reconstruction solution from 2D images, combining computer vision, photogrammetry and PyTorch generative models. Automated preprocessing, data augmentation and inference pipelines to make experimentation more reliable, then deployed on AWS/Docker with a business-facing visualization interface to inspect reconstructions.
