Stephane KPOVIESSI

Machine Learning / AI Engineer

Available for a permanent position

Machine Learning • AI Agents • RAG

From models to AI applications integrated into business workflows.

Skills

ML & Computer Vision
PyTorch, Scikit-learn, preprocessing, augmentation, evaluation, generative models.

Agents & RAG
LLM, LangGraph, MCP, tool calling, embeddings, hybrid search.

Data & storage
Python, PySpark, Pandas, SQL, PostgreSQL/pgvector, Chroma.

Engineering
FastAPI, Go, Azure Databricks, AWS, Docker, Git/CI-CD.

Education

JUNIA ISEN Lille
Engineering degree - Big Data & Data Science, 2026.

JUNIA ISEN Rabat
Bachelor's degree - Electronics & Digital Systems, 2023.

Certifications

Microsoft AI Engineer Career Path
Microsoft Learn • **In progress**

Create ML Models in Microsoft Azure
Microsoft / Coursera • 2023

Supervised ML: Regression & Classification
DeepLearning.AI / Stanford Online 2023

Data Analysis with Python
freeCodeCamp • 2023

Languages

French - native
English - B2, Linguaskill Business

Leadership & associations

JUNIA ALUMNI
Network Committee

Vice President
Sept. 2024 - Aug. 2025
Led alumni network activities and professional events.

Communications Lead
Sept. 2023 - Aug. 2024
Managed announcements and promoted initiatives.

Profile

Engineering graduate in Big Data & Data Science, designing ML/AI solutions from data preparation to application integration. Experience in computer vision and generative models at Sylvagreg, data engineering at Allianz, and AI agent and hybrid RAG development with Seshat.

Experience

Seshat - Founder & AI Engineer Sept. 2026 - Present
Open-source agentic AI and automation platform

- Designed Python/Go services, local/cloud backend and Electron/React desktop application for business agents and workflows.
- Hybrid RAG: document ingestion, chunking, embeddings, PostgreSQL/pgvector and Chroma search, sourced answers.
- Agent orchestration with tool calling, MCP, human-in-the-loop and scheduled tasks; integration of multiple LLM providers and access control.

Allianz France - Data Engineer / Data Scientist Nov. 2025 - Apr. 2026
P4D, Advanced Data & Climate - Paris

- Migrated an Insurance datamart from SAS to Python/PySpark, with validation across 15,000+ lines of code; Medallion architecture on Azure Databricks integrating 150+ business rules.
- Built a geospatial Data Quality pipeline and SAS/Python automated tests to validate KPIs and secure regression control.

Groupe Sylvagreg - Machine Learning Engineer May 2024 - Aug. 2024
Lille, France

- R&D for a 3D reconstruction solution from 2D images, combining computer vision, photogrammetry and generative models in PyTorch.
- Automated preprocessing, data augmentation and inference pipelines to make experimentation and 3D generation more reliable.
- Docker containerization, AWS deployment and visualization interface to inspect reconstructions and support user testing.

github.com/EngineerProjects/Sylva3dGUI • github.com/EngineerProjects/sylva3D

LYNE ET FRERES SARL - Data Analyst 2023 - 2025
Strategic support assignments - Benin / Remote

- Analyzed business data with Python/Pandas and delivered insights through reports and Streamlit/web interfaces.
- Deployed internal open-source AI tools and automations (OpenWebUI, open models), with employee support and onboarding.

Selected Projects

SOLAR IRRADIANCE FORECASTING - Scikit-learn, Pandas, FastAPI
Weather data preparation, temporal feature engineering and forecasting model evaluation; FastAPI REST API to expose results.
github.com/EngineerProjects/solar-forecasting

AUTONOMOUS WASTE-COLLECTION ROBOT - AceObject - YOLOv8, OpenCV, Dijkstra
Python/YOLOv8/OpenCV pipeline to detect, classify and track waste while distinguishing it from obstacles. Dijkstra navigation for collection planning; exploration of reinforcement learning for decision-making and obstacle avoidance.
