Stephane KPOVIESSI

Data Analyst | Data Engineer

Available for a permanent position

SQL • Python • Power BI • Databricks

Commercial performance, KPIs, BI and data quality.

Skills

Analysis & BI
Commercial KPIs, reporting, Power BI, Streamlit, Python/Pandas.

SQL & data
SQL, PostgreSQL, modeling, quality, controls, tests.

Pipelines & cloud
PySpark, ETL/ELT, Azure Databricks, Azure Data Lake, Airflow.

Industrialization
Docker, FastAPI, Git, CI/CD, process automation.

Education

JUNIA ISEN Lille
Engineering degree - Big Data & Data Science, 2026.

JUNIA ISEN Rabat
Bachelor's degree - Electronics & Digital Systems, 2023.

Certifications

Data Analyst Career Preparation
Microsoft / LinkedIn Learning • 2024

Data Analysis with Python
freeCodeCamp • 2023

Create ML Models in Microsoft Azure
Microsoft / Coursera • 2023

Languages

French - native
English - B2, Linguaskill Business

Leadership & associations

JUNIA ALUMNI
Network Committee

Vice President
Sept. 2024 - Aug. 2025
Led alumni network activities and professional events.

Communications Lead
Sept. 2023 - Aug. 2024
Managed announcements and promoted initiatives.

Profile

Engineering graduate in Big Data & Data Science, with experience in commercial performance analysis, KPI monitoring and data reliability. At Lyne et Frères, I contributed to business activity analysis and decision-oriented reporting. At Allianz France, I worked on modernizing data processing and automating quality controls. I use SQL, Python and Business Intelligence to turn data into useful indicators for business decisions.

Experience

Allianz France - Data Engineer / Data Scientist Nov. 2025 - Apr. 2026
P4D, Advanced Data & Climate - Paris

- Migrated an Insurance datamart from SAS to Python/PySpark, validating functional parity across 15,000+ lines of code.
- Built a Medallion architecture on Azure Databricks integrating 150+ business rules, consistency checks and industrialized processing.
- Built Data Quality pipelines and SAS/Python automated tests to detect anomalies, compare KPIs, track gaps and secure regression control before production.

LYNE ET FRERES SARL - Data Analyst 2023 - 2025
Strategic support assignments - Benin / Remote

- Structured and analyzed commercial, operational and agricultural data with Python/Pandas to monitor activity KPIs, volumes, trends and gaps.
- Produced performance reports to support decision-making: result interpretation, identification of attention points and business-facing restitution.
- Automated recurring processing and delivered analyses through reports, Streamlit/web interfaces and regular exchanges with teams.

Groupe Sylvagreg - Machine Learning Engineer May 2024 - Aug. 2024
Lille, France

- R&D for a 3D reconstruction solution from 2D images, combining computer vision, photogrammetry and generative models in PyTorch.
- Automated preprocessing, data augmentation and inference pipelines; Docker containerization, AWS deployment and visualization interface.

BI & Data Projects

BI RETAIL SOLUTION - PySpark, Airflow, PostgreSQL, Power BI, Docker
Sales/supply-chain data pipeline: ingestion, PySpark transformations, loading into a PostgreSQL warehouse and Airflow orchestration. Commercial data modeling and Power BI dashboards to analyze sales, product monitoring, trends and business indicators.
github.com/EngineerProjects/BI_Retail

Seshat - Python/Go, PostgreSQL/pgvector, RAG, Electron/React
Open-source AI and automation platform: document ingestion, embeddings, hybrid search, local/cloud backend services, access control and business workflow-oriented agents. seshat-ai.com

WASTE-COLLECTION ROBOT - AceObject - YOLOv8, OpenCV, Dijkstra
Python/YOLOv8/OpenCV pipeline to detect, classify and track waste while distinguishing it from obstacles. Dijkstra navigation for collection planning; reinforcement learning exploration for decision-making and obstacle avoidance.
